# Who Benefits From Organic Cotton & Fair Trade Practices?

## ✓ Farmers & Rural Communities

Organic cotton is **natural, safe and free of toxic pesticides** and chemicals. It gives farmers consistently better yields and prices, and assures freedom from GMO seed corporations.

Fair trade practices guarantee farm workers **fair wages** and better work conditions. Farmers often own the land they till. They receive training, market assurance and fair financial credit. Rural communities invest premiums in necessities like schools, healthcare, sanitation and water.

## ✓ Our Planet & Wildlife

Organic farming practices are **regenerative**. Crop rotation and manual cultivation maintains healthy soil, uses less fossil fuels and **lowers the carbon footprint**, helping combat global warming. Animal habitats thrive when spared the pesticide contamination in crops, air and water.

Fair trade prices cover the costs of **sustainable production**. This allows farmers to use quality inputs and safer ecological methods that preserve the environment instead of degrading it.

## ✓ Women & Factory Workers

**Gender equality** and **women's empowerment** are core to the Fair Trade model and essential for sustainable change and impact.

Woven throughout those standards is a commitment to ensuring that women in communities and workplaces receive equal share in the benefits of their work, and freedom from discrimination and harassment.

**Fair trade** also ensures **no child labor**, decent wages, benefits, health and safety standards in the workplace, the right to join trade unions, and a conducive work environment. A direct contribution is also made into a workers fund to supplement wages.

## ✓ You, the Consumer

You'll feel the difference when wearing **pure organic cotton!** Conventional cotton can retain harmful residues and is often treated with toxic finishes that off gas.

The **Fair Trade Certified** label presents an alternative to conventional apparel. By choosing **ethically made** products that are independently certified, you participate in change.
