# GENERAL CERTIFICATE OF COMPLIANCE

To Whom It May Concern

We hereby certify that our **childrens'** products listed below are in compliance with lead content limits **for childrens' products** under Consumer Protection Safety Improvement Act (CPSIA).

Organic Cotton Baby Onesies
Organic Cotton T-shirts: Baby, Toddler, Boys/Youth Sizes

This is based on independent agency certification and testing programs as below:

Oeko-Tex® Certification: Certificate # 09.HIN.66525
All of our organic cotton products have been tested for harmful substances according to the Oeko-Tex® Standard 100 by Hohenstein Institute. Products that have been certified according to the Oeko-Tex® Standard 100 comply with the lead content limits stated in the Consumer Products Safety Improvement Act (CPSIA) and are already in full compliance with CPSIA's third and final phase which goes into effect in August 2011.

Organic Certification under GOTS standards: Certificate # CU 020876
To comply with organic certification procedures, Control Union (CU) periodically conducts random product sample tests for heavy metal contamination at independent labs. As per organic standards, lead content is required to not exceed 4 ppm (parts per million) which is well below CPSIA lead content limit of 600 ppm.
